Brain Coaching — Cursor Setup Guide

Step 1: Flutter Install karo

1. https://docs.flutter.dev/get-started/install par jao
2. Apne system (Windows/Mac) ke hisab se install karo
3. Terminal me check karo: `flutter doctor`

Step 2: Project banao

Terminal me:

```
flutter create brain_coaching
cd brain_coaching
```

Step 3: Cursor me kholo

Cursor me `brain_coaching` folder kholo.

Step 4: Ye PROMPT Cursor AI ko do (Ctrl+K ya Chat me paste karo)

PROMPT (copy-paste karo):

```
Mujhe "Brain Coaching" naam ki Flutter app banani hai — EK codebase jo Android AUR iOS dono par
chale.

App: Mood-Based Daily Coach (Roman Urdu + English support)

PEHLA SCREEN (Home):
- Upar: "Subah Bakhair!" greeting
- Beech me: 5 mood emoji buttons (😊 🙂 😐 😟 😢)
- Neeche: "Check My Brain" bara button
- Sab se neeche: Bottom navigation (Home, Insights, Coach, Profile)

DESIGN:
- Rang: gehra neela (#1A237E) + sunahra (#FFD54F)
- Saaf, modern, khubsurat UI
- Har screen mobile-friendly
```

```
TECHNICAL:
- Flutter latest stable
- Ek hi codebase → Android + iOS dono
- State management: Riverpod ya Provider (simple)
- Mock data se shuru karo (asal sensors baad me)

Shuru karo: pehle Home screen banao. Code saaf aur comments ke saath likho.
```

Step 5: Dono par chalao

```
flutter run              # Android emulator ya real phone
flutter run -d ios       # iPhone simulator (sirf Mac par)
```

Yaad rakho

- Ek code = dono platforms! Koi alag coding nahi!
- Muse AI se poocho agar kuch samajh na aye!
